3:4 CAROUSEL TEMPLATE

Your profile grid is 3:4 and Instagram supports 3:4 photos in the feed. Slides made at 1080 × 1440 look the same in both places.

1. **In this package:** *carousel-blank-1080x1440.png* (a cream starting slide) and *carousel-margin-overlay-1080x1440.png* (transparent guide).
2. **In Canva:** Create a design → Custom size → 1080 × 1440 px. Upload the overlay, drop it on top of each slide while you design, and delete it before you download.
3. **The skeleton:** slide 1 is the first hook; slide 2 is a second first impression and must make sense on its own; the middle explains and proves; the last slide is the action.
4. **Keep it readable:** about 25 words or fewer per slide, text inside the dashed margin, and at least one real photo or proof slide.
5. **The action** goes on the last slide **and** in the caption. Use as many slides as the argument needs, and no more.

Your 30 carousel templates (with the $1K Challenge) are in My Account → Challenge Content.
